

Postgres DB

- Schema can be seen in 'SQL' file on github
- Will be hosted on Heroku soon

React Native Frontend

- Small developmental app set up with a few pages that be seen
- User auth/sign-in could be reevaluated

Manage user auth/signin,
Populate database from API calls,
Pull data when needed (sequelize & np)

REST and
GraphQL to create
endpoints for
React,
User input into
database

PGA API

- Tournament Information
- Golfer Information
- Tournament Groupings
- Real Time Statistics/Results

NodeJS Backend

- Express
- Sequelize and Node-Postgres

Heroku Schedule Add-On to make
each of these API calls at different
times
